Course Description

PURPOSE: To provide entry-level knowledge and skills to all members of the U.S. Armed Forces needed to fulfill the duties of a multidisciplinary assignment in public affairs, visual information, and communication in support of the commander's intent.

SPECIALTY AWARDED: See individual Service documentation for specialty awarded.

TRAINING METHODOLOGY: Resident only

COURSE DESCRIPTION: Students in Mass Communication Foundations learn and apply the concepts and skills needed in both the public affairs and visual information specialties. They learn and apply design thinking principles to question effectively, identify problems and provide a solution-based approach within a communications framework, applying the fundamentals of journalistic writing, still photography, videography, digital graphic design, and interactive multimedia in their products. Students are introduced to and apply the fundamentals of English and journalism to news and narrative stories, captions, and video scripts for use in both internal and external communication products. Instruction includes public affairs internal and external communications, media and community engagement, and preparing information for public release in accordance with Department of Defense directives.

Students learn and apply basic photography fundamentals, including optics, light and color theory, composition, exposure and lighting, studio photography, and use a digital single-lens reflex camera to capture both still and motion imagery of both controlled and uncontrolled action for historical documentation and in support of DoD themes and messages. Students learn digital audio capture methods and editing techniques, then use recording tools to capture audio they integrate into video sequences and digital media products. Applying video and editing techniques, students create video products to support military operations, training, and public affairs missions.

Additionally, students study integrated multimedia best practices and apply design and layout fundamentals, including color theory and typography, in the creation of all products. Each student will create vector-based products and raster-based graphics, and incorporate these and other previously created projects into interactive multimedia products they will package for use in multiple print and browser-based platforms. The course culminates with both individual and group capstone exercises, where each student will demonstrate the ability to integrate and apply the diverse knowledge and multi-disciplinary skills attained throughout the entire integrated course.

PREREQUISITES: See Army Training Requirements and Resources System (ATRRS) site: <u>https://www.atrrs.army.mil/atrrscc/</u>. School code 212.

Preface

REASON FOR NEW TRAINING: Supports tasks selected by the TTSB conducted on 30 August 2017.

IMPLEMENTATION DATE: Training for this course will begin on 1 October 2019, and will be submitted to the appropriate accreditation agencies upon TPI approval by the Commandant.

COURSE DATA: The annual Service input data is a projection for FY 2020.

Course	Length	Student Maximum	Student Minimum	Annual Course Cap	Number of Iterations
MCF (FY20)	108 days	24	12	768	32*
MCF (FY21 +)	108 days	24	12	912	38*

MANPOWER:

* FY2020 32 planned iterations; FY2021 38 iterations

MCF FY20 Instructors required: 105

Course Training Standard

- 1. This Course Training Standard applies to tasks selected and mandated by the uniformed services as listed in the TTI signed in January 2017.
- 2. A thorough learning analysis of these changes and the impact on the delivery of instruction has been conducted. The CDRE reflects required manpower or equipment resources.
- 3. This task listing provides for the development of lesson plans, training materials, student performance and progress measurements, and the TPI. It has been organized and sequenced and reflects the levels of student competency and projected instructional hours to complete task training.
- 4. Projected hours have been determined by each unit.

Measurement Plan

- 1. This Measurement Plan establishes procedures for evaluating student achievement of objectives in the Media Communication Foundations (MCF) course as mandated by the Training Task Inventory (TTI) resulting from the Training Task Selection Board (TTSB) conducted in January 2017.
- 2. Evaluation methods. Knowledge-based tasks that support the planning or execution of a graded performance-based task may be assessed using formative assessments such as quizzes, homework, case studies, or small group learning exercises. For grading and reporting purposes, student progress is measured by the following evaluation devices:
 - a. Written (Knowledge) exams
 - b. Performance exams
- 3. Minimum standard. The minimum passing score for each evaluated item is 70 percent. The maximum score on a re-administered exam meeting the minimum standard is a score of 70 percent. Students must achieve a minimum passing score on each assignment before progressing in the course.
- 4. List of exams. All tasks will be evaluated.
- 5. Recycle. Students who are recommended for recycle will retain grades from all units in which they have successfully met the minimum academic standard for every assessment in the unit. Because of the integrated approach to training, it is possible the foundational training for the failed assessment begins earlier in the course than the unit that includes the assessment. They will be recommended for recycle back into the course on the day where the training supporting the failed assessment begins. As an example: The student passes units 1 and 2, but fails the Awards & Presentations performance exam in unit 3 of Functional Area 1 because of problems with correct exposure. In order for the student to receive the foundational training, practice and feedback in exposure which begins on training day 18, they will be recommended for recycle back in to the course on training day 18, but retain grades from units 1 and 2 of Functional Area 1.
